5 Essential Dune Safety Tips

#1: Take a Lap - Know The Terrain

Weather and wind change the dunes daily. Before you rev it up, do a slow lap so to get the lay of the land. Recommended lap route - see map

#2: Keep Moving!

If your vehicle has an issue, move out of the way quickly or send up a spotter to give warning while you bail out.

#3: Keep an Eye Out

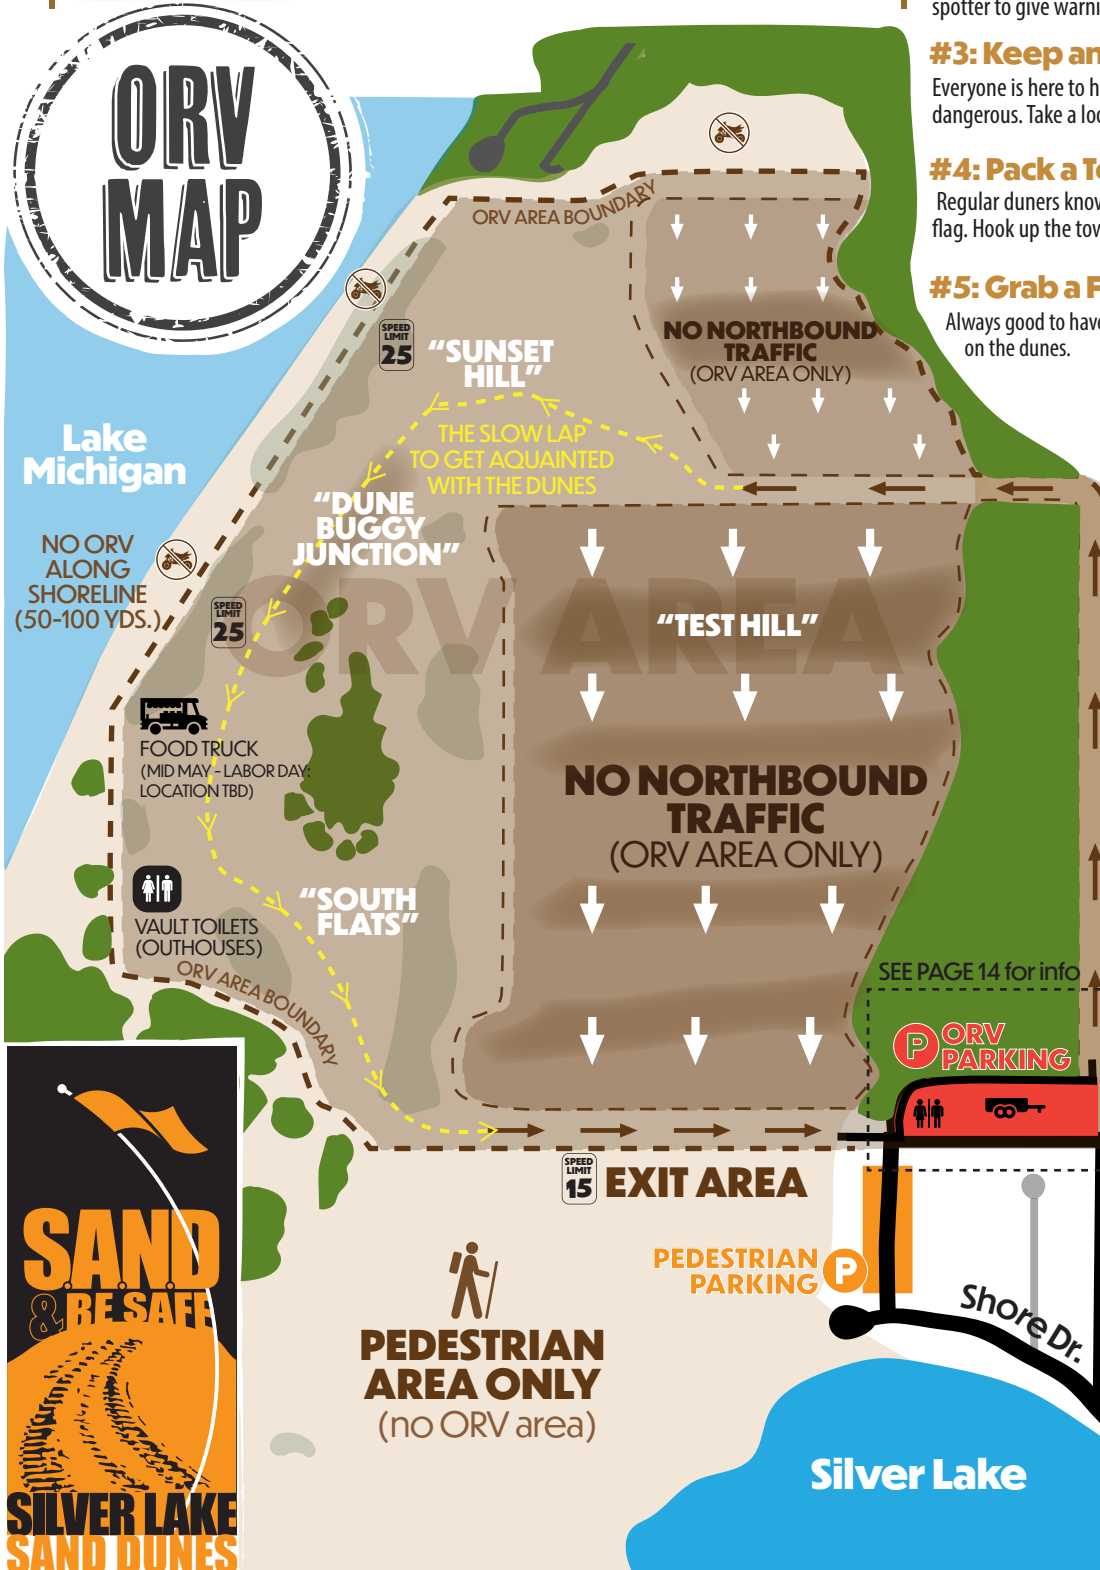

Everyone is here to have a great time, but overconfidence can be dangerous. Take a look around before making any quick moves.

#4: Pack a Tow Strap

Regular duners know when they see a tow strap, you're waving the white flag. Hook up the tow strap and help will be on its way!

#5: Grab a First Aid Kit

Always good to have the first aid basics on hand when you roll out on the dunes.
